I had bought this, hoping the wallpapers would be in game so I could take screenshots. I was a bit sad finding out, they're downloaded to your computer for use & nothing changes in game.

Overall, I learned something new for future Steam buy's. I've been wanting this game & excited for it. The game seem's worth the sales price so far from what I've played & with the added on DLC purchased along side it! Happy, Thank You!. This game still needs work, kinda okay but gets boring quickly
5V10 toxic 10 year olds. 1980s bad cop action movie with VHS aesthetics.

It has funny one liners, nazis, robots and dinosaurs.

Generally it's a solid 7V10 movie, but I'm willing to add a point for the "knock knock" joke, so consider it **8V10.. I was laughing for half an hour! Punchlines are so funny. Fun game.**

Putin needs to be nerfed, lol.. Truly an inspirational game, I came in with low expectations and came out amazed. I never thought I could like a game like this so much but the blocks man, I got addicted and I never got out. yes.. This game used to be fun. I played for awhile early on and then took a break for a while. I recently came back to it and lots has changed. The servers are complete\u2665\u2665\u2665\u2665\u2665 overall server ping is terrible, the new UI (unneeded) looks okay but the devs did not really address many of the real gameplay/mechanics issues. If you've played this game at all, you will notice a lot of seasoned players are beginning to leave, queues for ATs during war time are drastically lower than they used to be.

Another huge problem if you are looking at starting this game as a new player is that prices for gear, guns, soldiers, etc, have gone up 200%. Really disappointed in the direction this game has gone.

***** Edit: As of August 15, 2017 the game is still plagued by numerous issues. The playerbase continues to dwindle, forcing many of the war battles on the RTS side into auto-resolve. Many times you will sit in queue for an hour or more waiting for a game to pop, only for it to be full of alt accounts, or trolls and the game is over in less than 10 minutes. If Reto put a "waiting" badge in the game, everyone that plays would have it in gold in less than a day.**

The auto-resolve function is constantly abused, as is the morale mechanic. People play the morale war rather than actually playing battles. The true RTS is almost non-existent, the war map lags or doesn't update properly.

The FPS side has issues with frame drops, lag, and even after the introduction of the new spawn system it still has huge issues with spawn camping. You can find a few good people to play with, but overall the community (especially in the H&G forums) is toxic.. The non-serious, overly comic style of writing may be enjoyable by some and not by others. However, dying in a random way when two options are given, with no idea what can or should happen, more than two hours into the story in the seventh chapter and no having a chance to even re-start that chapter, instead being forced to start again from the very first page, is not something anyone should enjoy.

. Belated review. This indie physics-based puzzle game is pretty fun. Your goal is to navigate a spaceship to the end of a level. Sure, it sounds easy enough, but there are always obstacles in your way. The main hook of the gameplay is mixing

and matching parts on your spaceship in order to solve physics-based puzzles in each level (pushing and pulling objects, smashing through things, etc). I found the controls to be a bit touchy at times and wasn't a huge fan of the ship-building interface, but overall, there's not much bad to say about this game. Just go into it without any grand expectations. It's pretty laid back and is a nice way to kill a few hours. There are also a number of advanced levels available, in addition to the main story chapters, for those looking for a bit more challenge.. Port is much much better now. XSEED deserves praise for reaching out to Durante and fixing nearly everything that was bad about it. The game is great, it's an overlooked gem that got much less recognition than it deserved back when it came out on the Wii. If you have any interest in rts-like games with city building elements and a really cool world, you should play it.

This game is hella fun and has a great art style! It's entertaining for players of all skill levels with a low barrier entry to entry and a high skill ceiling. Would absolutely recommend to both my casual and competitive friends!. Not bad but wouldnt reccomend it. The game's mechanics and physics arent really good.. I understand it is a 8-bit pixel game but still..... Another great addition to CMS2015. This adds more depth to the game. The cars are awesome. Such great detail to the cars and new parts to play with. This is well worth buying if you are already into this game. 10/10. I had no idea that the price of \$2 could make it so far. The music was constantly a 10/10 and I hope in the future more content is released. Only the real will play this game.. It's... one of the better casual puzzle games. But it's still a casual puzzle game.. I really enjoyed playing this game in the beginning. After I got to the further chapters it lost its touch on me. Maybe it was because I went for all the achievements and kept replaying levels but it started to feel like a chore more than a game. Great story though. Made me feel happy and sad.. This is truly many games in one - slice eggplant a la fruit ninja, sneak in the shadows like Thief, engage in dashing and dastardly swordplay. Or, if there isn't a sword handy, beat an unsuspecting guard to death with whatever is handy: torches, bottles, or that perfectly prepared eggplant from earlier.
